December 26, 2002

Ms. Hagerty et al:

33-5 [As a taxpayer in Johnson County Iowa, I strongly protest the proposed lease for the Camp Daybreak property on the Coralville Lake. Your "impartial" environmental assessment is so flawed and erroneous that it would be impossible to accurately pronounce "no impact" using such skewed and, in many cases, invented data.]  
31-1

For example,

- 13-4 \* [the location of the wellhead shown in the EA is more than 800 feet in error and two other wellheads adjoining the property are not sited at
- 6-1 \* [The COE Master Plan designates this land as low intensity recreation or, in some areas, protected from ANY alteration. Do you intend to violate your own policy?
- 13-2\* The EA contains not one shred of information about the proposed lessee's plan for waste water disposal. Is it the COE's position that huge amounts of sewage and gray water will have no environmental impact?
- 6-1 \* [The EA makes no comment on the impact dredging and restructuring the shoreline would have to accommodate docks and a beach. (Master Plan designates this shore as completely protected from public or private development. Again, are you violating your own policy? How much will you fine yourself?)]

Please enter my name among those who fervently oppose the destruction of this woodland for a privately controlled resort hotel.

Sincerely,

*Kristin Beatty*
